Dear Ori and Halcyon Manufacturing Inc;

Thank you for your support of Craig High School and our Marine Biology program with your generous donation of gear! We are very excited to introduce our students to the wonders of our local aquatic environment. The equipment you supplied will help this class gather data and begin looking at changes to local sites over time.

Students will begin their research next fall. We will be sure to share pictures with you and tag Halcyon in any social media posts we make.

I am unaware of any other public high school in the state of Alaska conducting marine field research like this. Our students will be provided an experience that could have significant impact upon their post-secondary plans and goals. I hope you appreciate the potential lifelong importance your donation will have.

Without the support of companies like yours, this opportunity would have been very difficult, if not impossible, to provide. Thank you again!

Most Sincerely,

Josh Andrews  
Principal, Craig High School  
Craig, Alaska
