

Nomad
Backpack

Introducing the Nomad Backpack

Durable, waterproof, travel friendly.

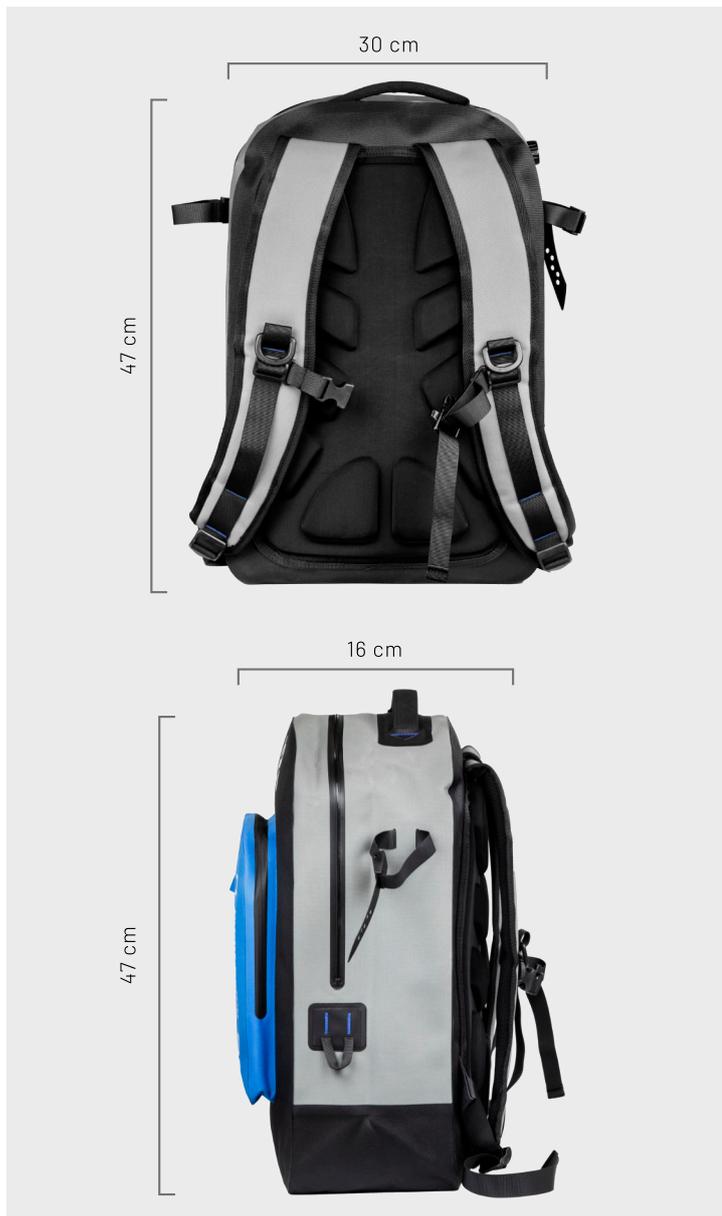

Built for divers who move between environments, this waterproof backpack offers reliable protection for sensitive equipment. Designed with Symbios rebreather transport in mind, it keeps your gear secure, organized, and ready for use.

Constructed from durable 600D TPU with airtight, waterproof zippers, it shields contents from water, dust, and harsh conditions. Its structured form and ergonomic carry design make it practical for both travel and daily dive operations.

Waterproof and Purpose-Built for Symbios Rebreather

Whether used as a dedicated Symbios rebreather carrier or a standalone dive bag, it adapts to your workflow. Clean design, robust materials, and functional layout ensure dependable performance across dive trips, expeditions, and everyday transport needs.

Dry Backpack
